

VISION

To develop as a centre of excellence in electrical and electronics engineering to produce competent and compassionate engineering professionals and to facilitate R & D activities to cater to the developmental needs and to provide a creative environment for developing young entrepreneurs with social concern.

MISSION

To provide the highest quality teaching and learning environment to produce Electrical and Electronics Engineers having strong theoretical foundation, good design experience and exposure to research and development.

To inculcate value based, socially committed professionalism for overall development of students and society.

To develop and disseminate technology and help create systems to meet the energy requirement of the nation.

PROGRAMME EDUCATION OBJECTIVES (PEOS)

PEO 1	To impart fundamental knowledge and skills to students to analyze, design and test the electrical systems and solve the problem encountered in their fields.
PEO2	To provide students with the ability to work in a diverse work environment and develop better communication skills as members or leaders of multi-disciplinary teams.
PEO3	To make the students capable of integrating academic insight with relevant industry scenario for fulfilling industrial development needs.
PEO4	To prepare the students to have a commitment to life-long learning.
