

Vision of the department

To develop as a centre of excellence in Electrical and Electronics Engineering to mould competent, committed and compassionate engineering professionals, with best technical, analytical, innovative and interactive skills.

Mission of the department

- To provide quality teaching and learning environment to produce Electrical and Electronics Engineers having strong theoretical foundation, good design experience and exposure to research and development.
- To inculcate value based, socially committed professionalism for overall development of students and society.
- To develop and disseminate technology and help create systems to meet the energy requirement of the nation.

Program Educational Objectives

- Utilize fundamental knowledge and skills to design, analyze and test electrical systems to meet the needs of the society and industry.
- Function ethically in multidisciplinary teams to develop sustainable solutions for global, environmental and social issues and communicate effectively.
- Integrate academic insight with relevant industry scenario for collaborative research.
- Develop creative and critical reasoning skills for diverse career and lifelong learning.
